**“Stress and Resilience throughout lifespan”**  
**Meeting at IPNP on Thursday 6<sup>th</sup> December 2018**

---

Scientific talks on Stress/Resilience organized around 3 developmental stages:

Start at 10 am

**Adulthood:** (Ch : P. Billuart)

- Dr. Yann Auxéméry (MD, École du Val-de-Grâce, Université Paris VII): From stress to trauma, dialogues between researchers and clinicians
- Dr. Pierre Gagnepain (Université de Caen Normandie): Suppressing unwanted memories
- Dr. Eleni Tzavara (IBPS): Mouse model of resilience

Lunch time (12 am - 2 pm)

**Adolescence:** (Ch: A. Marzo)

- Dr. Thérèse Jay (IPNP): Hyper-responsivity to stress during adolescence and its long term changes on specific neuronal circuits
- Dr. Boris Chaumette (MD/PhD, McGill University): Stress and resilience in at-risk patients during the onset of psychosis

Coffee break (3.15 pm – 3.30 pm)

**Gestational/Perinatal life:** (Ch: A. Bery)

- Prof Isabelle Mansuy (University of Zürich and ETH Zürich): Transgenerational inheritance of the effects of early life trauma: Epigenetic mechanisms in the germline
- Prof Stefania Maccari (UMR 8576 CNRS, Université de Lille): Behavioral and molecular effects of perinatal stress

Organization committee:

from the “IPNP Thinking Group” #1 Neuro-Development and Psychiatry  
Amandine Bery, CNRS INSERM, amadine.bery@inserm.fr  
Aude Marzo, MCU Paris Descartes, aude.marzo@inserm.fr  
Pierre Billuart, CRCN INSERM, pierre.billuart@inserm.fr
